### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Smart (4,909,170). Smart discloses the claimed structure including a structural member for a sailboat with two parts 19, 20, and anchor strips 21, 22 joined with an adhesive 25.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 7, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smart. Smart does not disclose teeth or extruded anchor strips. It would have been an obvious choice of engineering design to a person of ordinary skill in the art at the time the invention was made would have been to form the anchor strips with teeth for improved securement and high strength and to be extruded for low cost and high strength and light weight.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smart in view of Wolinski et al. Smart does not disclose methacrylate adhesive. Wolinski et al teach methacrylate adhesive (note the Abstract, for example). It would have been

obvious to a person of ordinary skill in the art at the time the invention was made to form the adhesive of Smart to be methacrylate as taught by Wolinski et al to have a long life, requires no heat treatment, and forms a strong bond even under water or under adverse environmental conditions.

6. Claims 11-20 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smart (4,834,013) shows a mast.
